

# Test Drive Program

## Who is it for?

Surgio's Test Drive program is available for any facility looking for solutions to address current challenges.

Is your SPD still tracking everything on paper and considering going digital?

- Try out *Surgio SPD*.

Is your facility struggling with managing high volumes of vendor loaner trays?

- Try out *Surgio Vendor*.

Does your facility need a better way to manage annual competencies or expedite staff training?

- Try out *Surgio Educate*.

Does your facility process flexible scopes, but track them on paper?

- Try out *Surgio Scopes*.

## What are Surgio's solutions?

**Surgio**SPD: OR/SPD Surgical Instrumentation Tracking & Optimization

**Surgio**Scopes: Scope Processing & Management

**Surgio**Educate: Custom Course/Competency Creation & Management

**Surgio**Vendor: Hospital Vendor Rep Management

**Surgio**Insight: Surgio Insight provides comprehensive analytics that allows you to compare across the enterprise, down to individual facility or a user.

## How does the Test Drive program work?

You are in the driver's seat - Surgio will work with your facility to identify your needs and discuss what product might make the most sense for your team. Once we have had a chat, you can expect Surgio to present the best solution and we can get your Test Drive started!

## Give me an example?

Maybe your facility doesn't have an instrument tracking system and you have been evaluating solutions but haven't carved out the budget or don't have the time to evaluate before making such a large investment. We would suggest you start with Surgio SPD.

We know this can sound daunting, but we work with you to break the process down into simple steps that can rapidly improve your department. We will also provide helpful tools and guides for you to build out your data within Surgio. Following some simple steps will keep the process from being overwhelming.

## What will you measure?

We will work with you to identify performance indicators to help track your progress as you use the platform.

Surgio will your review progress over the duration of the Test Drive to ensure you are making the changes you expected.

## How much does it cost?

Nothing! You can participate in the Surgio Test Drive program at no cost to your facility.

## How long does it last?

Surgio's Test Drive can be leveraged for up to 6 months. We feel that this is a good amount of time to see the benefits of the system. We are happy to work with your facility to come to an agreement on duration that allows your site to illustrate value.

## What if I need more help?

No problem! We have a variety of different implementation options if you need some support. You can still use the platform at no charge but leverage our resources to get setup.

## What equipment will I need?

This all depends on the solutions you are interested in. During onboarding, Surgio will help your facility identify the specific hardware needed to get the most out of our solutions. As an example, to utilize Surgio SPD, you will need a computer, scanner and label printer, but Surgio Educate only requires a computer.

## THE BOTTOM LINE...

If you are considering any digital solutions within your SPD, let's have a conversation about how we might be able help your facility accomplish that goal. Worst case scenario, you finish the Test Drive with more knowledge of the solutions available. Best case, you get the opportunity to kick-start the use of a system for your department.
